

LineBacker®

Flange Isolation Kit

LineBacker® isolation kits utilize a patented rectangular sealing element, referred to as a “quad” ring, in combination with a unique groove design to effectively seal and isolate flanges of all types. With the unique “quad” ring design, elastic memory is provided for elastomers not normally associated with this characteristic. Materials such as PTFE and FKM may be used as sealing elements which dramatically increase the options available for matching isolation kit materials to service and environmental conditions. LineBacker® isolation kits are available in a variety of retainer and sealing element combinations for matching gaskets to service and environmental conditions. This greater variety of materials also provides excellent temperature and chemical range compatibility. LineBacker® isolation kits are self energizing, resulting in effecting a positive seal without excessive bolt loads required with flat gaskets. Refer to chart for LineBacker® isolation kit temperature range and material compatibilities.

BEFORE TIGHTENING

The flange faces come in contact with the sealing elements, which extend slightly above the surface of the retainer. As the flange is tightened the sealing elements are compressed and move sideways into the inclined portion of the groove, developing a high unit pressure against the flange faces.

AFTER TIGHTENING

The flange faces have come into firm contact with the retainer, thus encapsulating the sealing elements within grooves. At the same time, the unique LineBacker™ seal configuration provides elastic memory for elastomers not normally associated with this characteristic resulting in a simple flat gasket with extremely high loading and self energizing characteristics without adverse cold flow problems.

SIZES

- » All standard ANSI and AWWA flange sizes from ½” and above
- » Custom odd sizes and shapes

PRESSURE RATINGS

- » Rated up to ANSI 900#.
- » Pressure from hard vacuum to 2,225 psi

LineBacker® Flange Isolation Kits

LINEBACKER® USED IN OLYMPIC FLAME TOWER

The traditional “lighting of the torch” concluded a two-hour opening ceremony celebrating the start of the 2002 Winter Olympic Games in Salt Lake City, Utah. While the identity of the “individual” who would light the flame had been kept a closely guarded secret, the crowd warmly greeted America’s gold medal winning ice hockey team from 1980 with chants of “U-S-A” as they lit the flame. The Olympic torch, designed and built by Wet Design, included 2-inch and 4-inch diameter 150 ANSI LineBacker® isolation kit. Chosen for their unmatched sealing reliability, LineBacker® isolation kits were an integral part of a system that fueled an Olympic flame that was to burn brightly throughout the 2002 games.

CUSTOM ISOLATION KITS

Custom isolation kits may be manufactured for flanges from ½” diameter and up. For added flexibility and to accommodate a wide variety of flange types, sealing elements may be positioned anywhere between the I.D. and the bolt circle of the gasket. In addition, GPT has designed and installed large diameter sealing kits with two sealing elements to provide maximum protection and reliability.

Custom shaped isolation kits may be manufactured to precise customer specifications for sealing mating surfaces of any configuration.

SEAL ELEMENT TEMPERATURE LIMITS

Elastomer	Minimum Temperature (°C/°F)	Maximum Temperature (°C/°F)
Nitrile	-54/-65	121/250
EPDM	-54/65	125/257
Viton®	-29/-20	177/350
PTFE	Cryogenic	232/450

GPT LineBacker® Ordering Guide/Worksheet

Quantity	Nominal Pipe Size	ANSI Class	Gasket Type	Gasket Style	For LineBacker® Sealing Gaskets		Washers	Washer Material	Sleeve	Gasket I.D. Flange	Type
Specify Below	Specify Below	150# 300# 400# 600# 900#	E = With Hole Bolts F = Ring (No Bolt Holes)	LB = LineBacker® RC = Rubber Coated	<u>Retainer</u> G-10 G-11	<u>Seal Element</u> Nitrile Viton® EPDM Teflon® (LB only)	SW - Single Washer DW = Double Washer	1 PC = 1 Piece Acetal G-10 G-11	Mylar G-10 G-11	Specify Below	W = Weld Neck S = Slip On R = RTJ O = Other Denote Specs. & Table
Quantity	Nominal Pipe Size	ANSI Class	Gasket Type	Gasket Style	For LineBacker® Sealing Gaskets		Washers	Washer Material	Sleeve	Gasket I.D. Flange	Type

					<u>Retainer</u>	<u>Seal Element</u>					

FOR LINEBACKER® ISOLATION KITS OVER 24" IN ADDITION TO THE ABOVE PLEASE SPECIFY:

Flange Facing (Raised, RTJ...etc)		Nominal Bolt Diameter (Threads/Inch)	
Flange I.D.		Sleeve Length	
Flange O.D.		Pipe I.D.	
Flange Thickness		Steel Sleeve I.D. (For Concrete Pipe)	
Number of Studs/Bolts		Product in Line	
Stud/Bolt Diameter		AWWA Class & Table (Or other similar std.)	
Stud/Bolt Hole Diameter		Internal Lining	
Stud/Bolt Circle Diameter			

NOTE:
Caution! Bolts with smooth shank portions may not fit within sleeves. Verify prior to ordering.

LINEBACKER® TYPICAL PHYSICAL PROPERTIES

ASTM	Test Method	G10 Epoxy/Glass	G-11 Epoxy/Glass
D149	Dielectric Strength Volts/Mil (Short Time)	800	550
D695	Compressive Strength (psi)	66,000	50,000+
D229	Water Absorption (%)	0.10	0.09
D790	Flexural Strength psi	LW 65,000 / CW 52,000	57,000
D638	Tensile Strength psi	LW 40,000 / CW 32,000	41,000
	Temperature Range °C	-200°F - 302°F -129°C - 150°C	-50°F - 392°F -46°C - 200°C

MANUFACTURING LOCATIONS

LineBacker® isolation kits are manufactured in Wheat Ridge, CO. Our facility utilizes the industry's most technologically advanced manufacturing equipment and finest glass reinforced epoxy laminates along with premium elastomers to become the industry's leader in isolating kits. GPT prides itself on highly innovative, engineered products that can only be developed from the best raw materials. GPT produces innovative solutions that enhance the integrity of pipeline systems today to meet the demands of tomorrow. GPT also offers our application engineering services to optimize product selection, advise and train installation best practices, supervise installations and design isolation systems specifically for your application.

GPT Wheat Ridge, Colorado

LINEBACKER® FLANGE ISOLATION KIT

- » Guards against blowouts
- » Protects against hostile environments
- » Usable with any type of flange
- » Matches gasket materials to service conditions
- » Lowest possible clamp and compressive load
- » Available in all standard ANSI and API flange sizes from ½" to 144"+
- » Available in custom or odd sizes and shapes
